1. Triton School Corporation's Acceptable Use Policies

The educational value of student technology and Internet access is the joint responsibility of students, teachers, parents and employees of the Triton School Corporation (TSC). Since access to technological advances are a valuable and limited resource, students are expected to place a premium on the quality of use. Taking up valuable bandwidth and access time to pursue frivolous ends, would not be consistent with the mission of the TSC. These statements are responsible for setting and conveying the standards that their children should follow when using media and information sources. TSC makes the district's complete Internet policies and procedures available for review by all parents, guardians, and other members of the community.

- **Care and Usage Expectations**

- A. All users must be consistent with the educational mission and goals of the school district.
- B. The intent of the use policy is to make clear certain cases, which are consistent with the educational objectives of the school district, not to exhaustively count all such possible uses.
- C. The Superintendent and his designees may at any time make determinations that particular users are or are not consistent with the purpose of the school district.
- D. Parents and students will be required to sign the Internet usage form for their students to participate in accessing the Internet.
- E. Electronic devices and the cases loaned or leased to students and staff shall be used only for educational purposes that directly relate to school projects or assignments, unless otherwise explicitly authorized by a building administrator.
- F. Users are responsible for the proper care of electronic devices at all times, whether on or off school property, including costs associated with repairing or replacing the device.
- G. If a device is stolen, a report will be made immediately with the building principal and the technology director. If the principal or technology director cannot locate the device, then the parents will need to file a report with the local law enforcement.
- H. The policy and rules apply to the use of the electronic device at all times and/or places, on or off school property. Students are responsible for obeying any additional rules concerning care of devices issued by school staff.
- I. Users shall not alter the device configuration in any way. No software applications shall be installed, removed, or altered on the device unless the technology director explicitly gives permission.
- J. The device is to be used only by the student or staff member to whom it is issued. The person to whom the device is issued will be responsible for any activity or action performed on the device.
- K. The device, cords, and case must be returned in acceptable working order by the last day of each school year, upon withdrawal or exit date from the school district, and whenever requested by school staff.

- **Outlining Prohibited Uses**

Unacceptable uses of school electronic resources include, but are not limited to, the following:

under the direct supervision of school staff. The student will also be subject to disciplinary action for any violations of Board policies/procedures or school rules.

C. Use of the Internet is a privilege, not a right. Students violating policies pertaining to standards of conduct or Internet use shall be subject to revocation of privileges and potential disciplinary and/or appropriate legal action.
